## Rates of Gross Job Gains and Gross Job Losses

---

### **From BLS about changes to Business Employment Dynamics Data**

Data in this release incorporate annual revisions to the BED series. Annual revisions are published each year with the release of first quarter data. These revisions cover the last four quarters of not seasonally adjusted data and 5 years of seasonally adjusted data.

From January to March 2009, gross job gains represented 6.8 percent of private sector employment in Idaho. Over the quarter, gross job gains at expanding establishments represented 5.0 percent of private sector employment, and gross job gains at opening establishments represented 1.8 percent.

Nationally this quarter, gross job gains at expanding establishments represented 4.2 percent of private sector employment, and at opening establishments represented 1.0 percent.

From January to March 2009, gross job losses represented 10.4 percent of private sector employment in Idaho. Gross job losses at contracting establishments represented 8.5 percent of private sector employment, which was higher than the national rate at contracting establishments (6.4 percent).

The rate of gross job losses at closing establishments (1.9 percent) was slightly higher than the 1.3 percent observed nationally. (See chart 3 and table B.) The rates of gross job gains and losses provide a picture of the amount of “job churning” that occurs in the labor market.

**Table B. 3-month private sector gross job gains and losses as a percent of employment, seasonally adjusted**

***Total Private for Idaho***

Category	3 months ended				
	Mar. 2008	June 2008	Sep. 2008	Dec. 2008	Mar. 2009
	<b>Levels</b>				
Gross job gains.....	8.1	7.6	7.6	7.3	6.8
At expanding establishments ...	6.3	6.0	5.9	5.5	5.0
